Bringing light to life with sustainable design

K-lite, a pioneer in the design and manufacture of premium architectural luminaires and lighting poles since 1977. With a decade of experience, the brand has earned a reputation for delivering reliable, aesthetically refined lighting solutions that cater to diverse design preferences and functional requirements.

Sustainable manufacturing, timeless design
K-LITE employs cutting-edge manufacturing and focuses on eco-friendly, energy-efficient LED technology. Each luminaire is manufactured to meet strict international quality standards while embodying architectural elegance and design precision.

Built to withstand the elements
K-Lite's landscape and outdoor lighting solutions are purpose-built for rugged environmental conditions and can withstand wind, water, direct sunlight, rain, and dust. All products feature high IP and IK ratings, ensuring superior protection against ingress and impact, making them ideal for demanding outdoor and landscape applications.

Comprehensive product range
K-lite provides one of the most diverse and flexible lighting portfolios, including linear wall washers, up-down lighters, LED strips and neon flex, promenade lighting, bollards and pathway lights, underwater luminaires, post-top luminaires, bulkheads and pathfinders, IP67 linear profiles, polar lighting poles, and new façade lighting series.

Lighting with purpose & aesthetics
Each K-Lite product is a compelling

combination of design quality and functional capability, whether used to light walkways, illuminate building façades, or beautify public spaces. K-Lite luminaires deliver superior light quality and outstanding durability, with unparalleled architectural beauty. Architects, landscape architects and urban designers use K-Lite products as solutions that seamlessly combine design, function and beauty to enhance their project designs.
